# About us

Edari is a software company established in the State of Kuwait and is a company specialized in enterprise solutions and ERP systems.

Edari team has more than fifteen years of experience in programming solutions for commercial and industrial organizations and dealings with major companies in the United States, Canada, India, and Egypt.

The work team has developed edari ERP system based on this extensive experience in the field to serve organizations of all sizes in the Gulf region and abroad, using the latest technology and software tools that ensure speed and efficiency in data entry, processing and extracting the necessary reports from them.

our vision

We constantly focus on innovation. We believe in simplicity, not complexity. We believe our region needs to own and control the core technologies. Our customers are always in our sights. We believe in saying no to too many projects, so we can really focus on the few that are really important and meaningful to our clients.

We believe in deep collaboration and cross-pollination of our groups, allowing us to innovate in a way that others cannot. And frankly, we accept nothing less than excellence in every group in the company, our self-honesty in admitting when we're wrong and the courage to change. We believe that no matter who's on the job, these values are built into our company.

# Mission

Our mission is to enrich the Arab world with an enterprise management solution made by 100% Arab hands from specialists who are experts in software analysis and software engineering made with the latest global technology of programming languages and databases, and comparable to the class-A programs of the world's leading companies in this field, which require huge amounts of money, a long time in implementation, and difficulty in daily use or customizations to suit the needs of each institution.

Through the training and support team, Edari aims to raise the level of the Arab user in using software and extracting reports that will raise the level of the institution financially and administratively.
